Android Shooting Guide

Follow the the steps below to set up your camera for filming.

Step 1: Open the camera and click on settings

< CAMERA SETTINGS			
REAR CAMERA			
Picture size 4:3 (12 MP)			
Video size FHD (60 fps) 1920x1080			
Scene optimizer Automatically adjust the color settings of your pictures to match the subject matter.	0		
Timer Off			
HDR (rich tone) Auto			
Tracking AF Focus on and track a subject selected on the preview screen.			
Super Slow-mo Single-take			
FRONT CAMERA			
Picture size 4:3 (8.0 MP)			
Video size FHD 1920x1080			

Step 2: Click on Video Size

0	UHD	3840x2160
0	QHD	2560x1440
0	FHD (60 fps)	1920x1080
0	FHD	1920x1080
0	18.5:9	2224x1080
0	1:1	1440x1440
0	HD	1280x720

UHD (60 fps), UHD, QHD and FHD (60 fps) resolutions don't support Tracking AF and Video effects.

Video stabilization isn't available in UHD (60 fps) and 1:1 resolutions.

Step 3: Select UHD (60fps)

Filming Tips

- Use a soft cloth to remove smudges from the lens.
- Use the back lens, not the selfie lens.

Shoot in landscape (horizontal) orientation, not portrait (vertical).

Pick a well-lit spot and do not shoot against a window or other bright background.
