

EDITING GUIDE

Welcome editors! This guide will help you transform your footage into a captivating project. Get ready to learn the tricks of the trade and put on the finishing touches!

Follow Along: Learn everything from setting up your editing software to adding titles, sound effects, and even color correction (for the more adventurous editors!).

Experiment: Editing is all about trying different things and seeing what works best for your story.

Get Feedback: Sharing your work and getting feedback can help make your project even more awesome.

1 Create New Project

Gather your footage and launch your editing software to set up a new project.

2 Edit The Timeline

Organize your footage to tell your story. Add transitions, filters and effects to help convey your message.

3 Titles & Credits

Improve your project with titles and captions. Don't forget to add credits for everyone that helped out.

4 Sound

Enhance your story with music, sound effects, and clean audio. Make sure that all your audio levels are consistent.

5 Color

Fine-tune the look of your project by adjusting the by color using the auto or advanced color correction tools.

6 Export & Save

Save your masterpiece in the perfect format for sharing.
